DETAILED ACTION

1. Applicant's Response After Final and Request for Reconsideration has been reviewed.

The Response is convincing and the Final Rejection dated April 9, 2003 is hereby withdrawn.

Claim Rejections - 35 USC § 103

2. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brick et al., US 6,269,342.

Brick discloses an electronic shelf label comprising a memory 334, 354, an interface 338A, 338B, 358A, 358B, a display 340, 362 and a processor 352. Brick discloses a series of self diagnostic tests for each shelf label via an audible or visual 362 (e.g., see col. 15) means. The programming device 350 is independent of a central processor 312. It is noted that the terms electronic shelf labels and electronic price labels are interchangeable. Self-diagnostice tests are well-known in the computer art. To periodically perform a self-diagnostic tests on each of the shelf labels independent of a status request issued by the central processor for Brick would have been obvious to one of ordinary skill in the art. Doing such would implement well known self-diagnostic testing means.

The Examiner is cognizant of the prosecution history of the instant Application and desires compact prosecution, but believes the present action is warranted.

Application/Control Number: 09/450,551

Art Unit: 3627

3. A further pertinent reference of interest:

Ho et al., US 5,428,741, discloses a host computer 18 and an independent processor 305 for performing self-diagnostics, e.g. col. 6, lines 41-69.
